

# ENVIRONMENTAL & SOCIAL SAFEGUARDS

Develop and disclose an impact assessment and mitigate and monitor negative impacts and risks.

### REAL

Emissions reductions and removals have been verified to have occurred (ex-post).

#### ADDITIONAL

Beyond what would have occurred in the absence of the project activity and under a businessas-usual scenario.

#### NO DOUBLE COUNTING

Protections to ensure credits are only issued and used once.

# High-quality carbon credit

#### ROBUST QUANTIFICATION

Measurable against a conservative baseline, accurate, takes account of uncertainty.

### NET OF LEAKAGE

Takes into account any increase in emissions outside project boundary due to activities taken by the project.

#### TRANSPARENT

Publicly available information on methodology, projects and credits.

#### INDEPENDENTLY VERIFIED

Validated and verified by a qualified, accredited, and independent third party.

## PERMANENT

Emissions reductions or removals are permanent or there are binding measures to mitigate and compensate for reversals.
