

# Summary of Changes

**ACR TOOL:** *Dynamic Evaluation of Baselines*

**VERSION:** 1.0 to 1.1

The following is a summary of the significant changes from version 1.0 of ACR's Tool for *Dynamic Evaluation of Baselines* published in July 2024 to version 1.1 published on July 29, 2025.

TOPIC	REVISION	SECTION
<b>Applicability</b>	This tool is now available for optional use for projects validated under a prior version of the <i>IFM on Non-Federal U.S. Forestlands</i> methodology and the <i>IFM on Canadian Forestlands</i> methodology. A list of specific requirements is provided to guide the implementation of this tool when it is optionally applied.	1.2
<b>Threshold for baseline stocking at remodels</b>	A threshold of 2% has been provided to ensure reasonable alignment of baseline stocking when remodels start mid-projection.	2.1.2
