Facility / Validation and Verification Body Rotation

Version 2.0, Last Updated October 14, 2026

This document provides information on the current status of Validation and Verification Body (VVB) rotation at facilities where multiple Project Proponents implement projects, as described in Clarification of Validation and Verification Body Rotation Requirements. At this time, the only project types for which this rotation require applies is Destruction of Ozone Depleting Substances and High-GWP Foam and Destruction of Ozone Depleting Substances from International Sources. This document is updated as new COI forms for relevant projects are approved.
